

Computer Security. My software is considered "Unknown" so most antivirus/firewall/windows security programs will relate a "false positive" to it.

My software is of course 100% clean and safe.

If you have issues with your computer security blocking it, try the steps below, and if that does not work, contact me by email.

support@locustware.com

Try this...

0- Uninstall the software

2- Disable antivirus to do the software install and then immediately turn your av/fw back on.

3- Right-click the software icon and select "run as admin"

4- Run As Admin Hack: <https://youtu.be/TB0I0z8jit0>
